

## FLASK CREATION

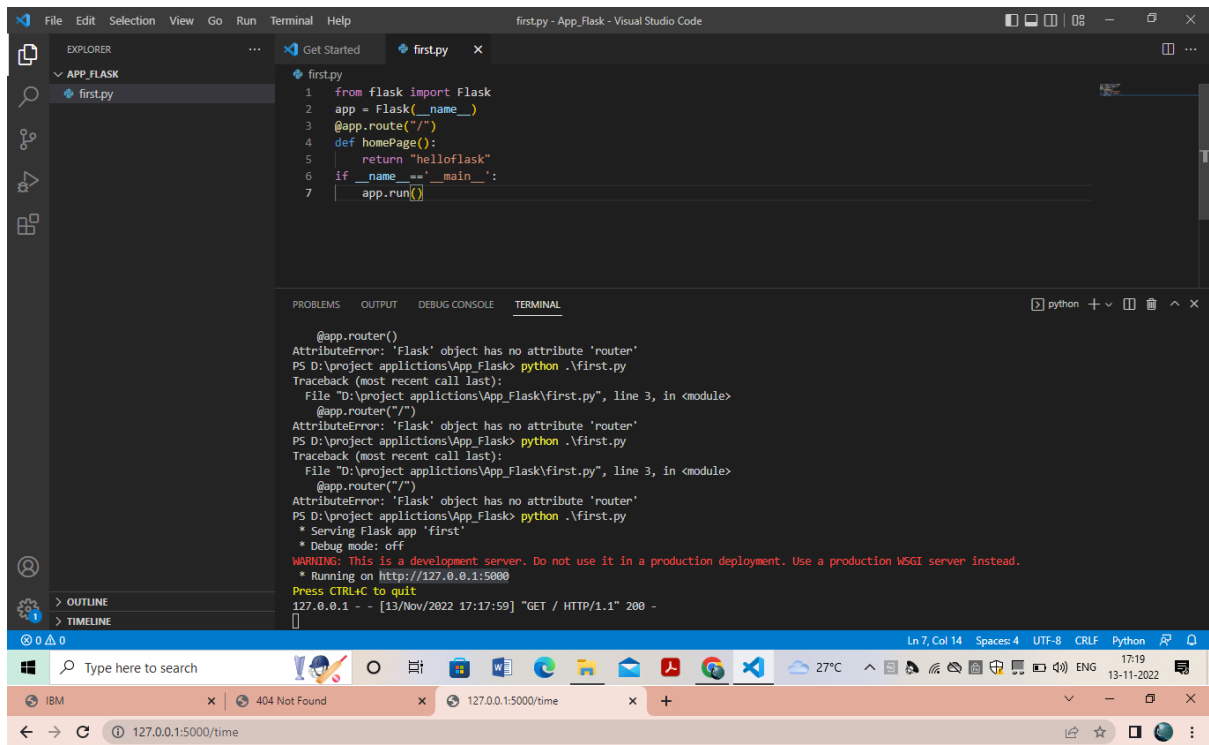

The screenshot displays the Visual Studio Code interface for a Flask application. The Explorer pane on the left shows a project named 'APP\_FLASK' containing a file 'first.py'. The editor window shows the following Python code in 'first.py':

```
1 from flask import Flask
2 app = Flask(__name__)
3
4
5 if __name__ == '__main__':
6     app.run()
```

The Terminal pane at the bottom shows the output of running the application. It indicates that the requirements are satisfied and shows the command prompt history. The final output is 'helloflask'.

```
Requirement already satisfied: zipp>=0.5 in c:\users\deekshitha\appdata\roaming\python\python39\s
ite-packages (from importlib-metadata>=3.6.0->flask) (3.9.0)
on9/site-packages (from Jinja2>=3.0->flask) (2.1.1)
WARNING: You are using pip version 21.1.1; however, version 22.3.1 is available.
You should consider upgrading via the 'c:\program files\python39\python.exe -m pip install --upgr
ade pip' command.
PS D:\project applications\App_Flask> python .\first.py
PS D:\project applications\App_Flask> python first.py
