## Literature Survey

Team No :1

**Team ID** :PNT2022TMID47116

**College Name** :MRK Institute of Technology

**Department** : computer science and engineering

Team Leader : Muthulakshmi S

**Team Member :**Deepika M

**Team Member :**Kavipriya R

**Team Member :**Srileka R

| S.<br>NO | TITLE | AUTHOR | YEAR | PROPOSED<br>WORK | PRONS | CONS |
|----------|-------|--------|------|------------------|-------|------|
|          |       |        |      |                  |       |      |

| 1. | Instant plasma donor recipient connector web application                             | Kalpana Devi Guntoju, Tejaswini Jalli, Sreeja Uppala, Sanjay Mallisetti | 2022 | Donors can upload the covid 19 certificate and they can make a request to the donor                         | Cloud computi ng | COVID19 people are encouraged to donate plasma   | Takes<br>more<br>time for<br>verificati<br>on.                                       |
|----|--|---|------|---|------------------|--|--|
| 2. | Convalescent Plasma Therapy: Data driven approach for finding the Best Plasma Donors | M N<br>Noorshidh<br>a and G.<br>Aghila                                  | 2021 | An effort to mimic the data of plasma donors as the donor's clinical history data is not publicly available | Cloud computi ng | Classificatio n and Regression algorithm results in the account of the donor selection task. | Even a tiny variance in data can lead to a high variance in the resulting prediction |

| 3 | Nearest Blood & Plasma Donor Finding: A Machine Learning Approach | Nayan Das,<br>MD. Asif<br>Iqba | 2021 | To build a platform with clustering algorithms which will jointly help to provide the quickest solution to find plasma donor. | Cloud<br>Techn<br>ology | Plasma recipient can effectively get donors using kmeans and agglomerat ive system in any situation | k-means has trouble clusterin g data where clusters are of varying sizes and density |
|---|---|--------------------------------|------|---|-------------------------|---|--|
|---|---|--------------------------------|------|---|-------------------------|---|--|

| 4. | Developing a plasma donor application using Function-as-aservice in AWS | Aishwarya<br>R Gowri | 2020 | This project plasma donor application is being developed by using AWS services | Cloud<br>Techno<br>logy | Selection of<br>the donors<br>are<br>available in<br>any<br>situations | Common cloud computin g problems |
|----|---|----------------------|------|--|-------------------------|--|----------------------------------|
|----|---|----------------------|------|--|-------------------------|--|----------------------------------|

| 5. | Synthetic Paper Separates Plasma from Whole Blood with Low Protein Loss | Weijin Guo , Jonas Hansson , Wouter van der Wijngaart | 2020 | The seperation of plasma from whole blood is the first step in many diagnostic testes. Here, investigate plasma seperation on interlocked micropillar scaffolds by the local agglutination of blood cells | Cloud<br>Computin<br>g | The simplicity of our device and the performa nce of our approach could enable better point-ofcare tests. | Time<br>consumpti<br>on |
|----|---|---|------|---|------------------------|---|-------------------------|
